Preface

The Mayor, Aldermen and Administration of the City of Bolivar have produced the following budget through numerous meetings and careful consideration of each line item, in each fund. Consideration was given to staffing levels, trends in normal operational expenses and the capital expenditures needed to replace aging equipment and supply the departments with new technology in an effort to provide the best and most cost effective services possible. We believe this budget provides the best possible services to the citizens of Bolivar at the most reasonable costs, while financially providing a path for progress and investment in the future growth of the City, without compromising on the premise that the City of Bolivar should have an operation reserve commensurate with the levels generally approved of a budget of this depth and breadth.

Budget Process and Obligations

State Statute Requirement

In accordance with the Revised Statutes of Missouri and City Ordinance, City Council adopted the following budget for the City of Bolivar, for the period January 1, 2017 to December 31, 2017. The approved budget is balanced within the total of estimated income plus unencumbered fund balances.

The beginning balance for all funds for the City of Bolivar for fiscal year 2016 was \$4,669,241. The estimated ending balance for the City of Bolivar for all funds at December 31, 2016 is \$3,500,000, of which, an estimated \$1,100,000.00 will be in the general reserve fund.

City Council held a regular session meeting, and has considered and passed a budget ordinance for Fiscal Year 2017 which can be found in Appendix A.

Detailed copies of the annual budget can be viewed in the City Clerk's Office in City Hall. Individual copies may be purchased at City Hall for \$10.

Budgetary Accounting Basis

All financial data included in this proposed budget reflect the modified accrual method of accounting. Under the modified accrual method capital purchases, bond issuance costs, and bond principal repayments are reflected as expenses when made and bond proceeds, grants for capital projects, special tax assessments, and utility related fees are treated as revenue when received. Regarding the budget itself, a modified zero-based-budgetary philosophy has guided all decisions in its making. A modified zero-based-budget is one that, while recognizing that some expenditures are the results of determinations of former Boards of Aldermen, all budgeted future expenditure categories have been examined on a line-by-line basis, with rational justification (prior trends, equipment needs, personnel requirements, etc.) provided from respective Department Heads, and have been approved by the City Administrator to be presented to the current Board of Aldermen for ultimate approval.

Program Budgets

The various programs funded under this budget are organized by department and fund account. These departments include General Fund, Fire Fund, Street Fund, Enterprise Funds including the Combined Water and Sewer Fund, Parks & Recreation Fund, Airport Fund, and Cemetery Fund. Additional budget categories include the Capital Improvement Tax for the General Fund, and Charitable Trusts / Memorial funds.

Department and Fund Overview

Each department and fund can be broken down to three main components: employee wages, salaries and benefits, normal and expected daily operational expenses and capital expenses that are needed to replace or rehabilitate tools, equipment and property. Further explanation of these components will be defined later in this document as we look at each department and fund on an individual basis.

^{**} The adopted budget is balanced as required.

There are a number of grant projects planned for the 2017 fiscal year. Typically, only the amounts needed to provide the match for these grants and payments for debt service are reflected in this budget. As grant proceeds or loan dollars are received there will be a matching expense thereby making those entries offsetting. During the continuing analysis of this budget, consideration must be given to these revenue and expense entries due to their effect on the actual figures that are accrued.

Prior Year's Revenue

The cash flow for grant supported projects and capital projects in the annual budget vary significantly from year to year. This is due to the fact that funds are often set-aside for several years in advance of undertaking a major project, or bonds may be issued producing revenue in one year with expenditures spread over the subsequent years necessary to complete the project. City Ordinance and State Statute requires that the annual budget be balanced with current revenues and prior year's revenues, which are in the form of unencumbered balances.

Conclusion

The 2017 budget reflects a number of needs the City of Bolivar has, given the current financial, infrastructural, and developmental scenario in which the City exists. This past year saw a continuation of rebounding for the City from a financial perspective, as evidenced by the City audit from KPM CPAs, P.C, and the continued increases in the health of the Unrestricted General Reserve fund. The City has maintained its efforts to meet citizen and infrastructural needs, while maintaining costs to the taxpayers as low as possible.

The current 2017 budget aims to continue that trend in that, while providing for the goods and services necessary to fulfill our solemn mission to the citizenry of Bolivar, City Staff anticipates a budgetary surplus of a projected \$536,211.00, which reflects a continued effort toward the financial security for the City of Bolivar, which has been a goal of tremendous importance as expressed by the Mayor and Board of Aldermen.

2017 promises to be a year of continued opportunity for the Elected Officials and Staff to work together for the good of the citizenry represented by the City of Bolivar. The Aquatics Center, continues to present economically difficult paradigms to overcome, but current managerial principle applications are making strides in that effort. The Golf Course and Airport, though doing much better in funding their operations

through fees for services, still need to be watched to make certain that they do not once again become mired in perpetually growing deficits.

The efforts offered in the area of economic development of the City of Bolivar are quickly beginning to bear fruit, and there is every reason to be optimistic for the future growth of the business and economic community with the City. Though new businesses, jobs, and increased economic activities almost always come together, resulting in increased revenues for the City via increased sales tax receipts, the continuing pace of the national economy being so stilted in its "recovery" has caused this budget to be calculated, with very conservative estimates for moderate growth over 2016.

It is believed that this budget is a true and accurate reflection of the priorities, plans, and predicted revenue streams and expenditures for the coming fiscal year, and will establish a pattern of fiscal responsibility that, if followed in subsequent years, will leave the City of Bolivar in an ever-increasingly good financial standing.

Respectfully submitted,

Darin K. Chappell, MPA
