- b. If any on-site employees had not previously completed a construction safety program, Contractor shall require those on-site employees to complete a construction safety program within sixty (60) days after the date work on the project commences;
- c. Contractor acknowledges and agrees that any of the Contractor's employees found on the project site without documentation of the successful completion of a construction safety program shall be required to produce such documentation within twenty (20) days, or will be subject to removal from the project; and

- c. Violations of Section 5 above and imposition of the penalty described in this Section shall be investigated and determined by the Missouri Department of Labor and Industrial Relations; and

In the event that the Missouri Department of Labor and Industrial Relations has determined that a violation of Section 292.675 RSMo., has occurred and that a penalty as described in this Section shall be assessed, the City shall withhold and retain all sums and amounts due and owing when making payments to Contractor under this Contract.

7. American Products Policy. The parties acknowledge that the City of Bolivar has adopted a formal written policy to encourage the purchase of products manufactured or produced in the United States. Whenever possible, the Contractor is requested and encouraged to use products manufactured or produced in the United States in the performance of this Agreement whenever the quality and price are comparable with other goods.

11. Assignment: Neither party may assign their rights or obligations under this Agreement without the prior written consent of the other party.

12. Waiver: All parties to this Agreement agree that the failure of any party to this Agreement to strictly enforce any term of this Agreement will not ever result in a waiver of such party to subsequently enforce the conditions of this Agreement.

13. Costs of Collection and Attorneys Fees: If the City in its sole judgment deems it necessary to retain an attorney as a result of a breach or alleged breach of this Agreement, the party who is found or adjudicated to be delinquent or otherwise in breach will reimburse the non-defaulting or non-breaching party for all costs, including reasonable attorney fees, incurred by the party not in default or not in breach.

The Contractor shall procure, and maintain for the life of this contract, the following:

- (a) Workmen's Compensation Insurance for all of his employees to be engaged in work under this contract.

Nor shall any such policy be cancelable by the insurer except upon at least ten days prior written notice to the City.

- (e) In case any or all of this work is sublet, the Contractor shall require the sub-contractor to procure and maintain all insurance required in sub-paragraphs (a), (b), and (c) hereof, and in like amounts.
- (f) Scope of Insurance and Special Hazard – The insurance required under sub-paragraphs (b) and (c) hereof shall provide adequate protection for the Contractor and his sub-contractors, respectively, against damage claims which may arise from operations under this contract, whether such operations be by the insured or by anyone directly or indirectly employed by him and also against any special hazards which may be encountered in the performance of this contract.

Paragraph (f) is construed to require the procurement of contractor's protective insurance (or contingent public liability and contingent property damage policies) by a general contractor whose sub-contractor has employees working on the project, unless the general public liability and property damage policy (or rider attached thereto) of the general contractor provides adequate protection against claims arising from operations by anyone directly or indirectly employed by him.

- (g) The Contractor and/or Sub-contractor shall furnish the City, prior to beginning the work, satisfactory proof of carriage of all insurance required.

All work shall be performed under the supervision of the Director of Public Works or his duly authorized assistants, agents, inspectors, or superintendents acting within the scope of the particular duties entrusted to them, in a workmanlike manner, and to his satisfaction. He shall decide all questions which arise as to the quality and acceptability of materials furnished, work performed, manner or performance, rate or progress of the work, sequence of the construction, interpretation of the plans and specifications, acceptable fulfillment of the contract, compensation mutual rights between Contractors under specifications, and suspension of the work. He shall determine the amount and quality of the work performed and materials furnished, and his decision and estimates shall be final. His estimate in such event shall be a condition precedent to the right of the Contractor to receive money due him under the Contract.

CONSTRUCTION STAKES

The Contractor shall furnish all lines, grades, and measurements necessary to the proper prosecution and control of the work contracted for under these specifications. Such stakes or markings as the Director of Public Works may require either for his own use or the Contractor's guidance shall be preserved by the Contractor until authorized by the Director of Public Works to remove same.

INSPECTION AND FINAL INSPECTION

The Director of Public Works shall at all times have access to the work during its construction, and shall be furnished with every reasonable facility for ascertaining that the stock and materials

used and employed and the workmanship are in accordance with the requirements and intentions of the specifications. All work done and all materials furnished shall be subject to his inspection and approval.

The Director of Public Works will not make the final inspection until the work provided and contemplated by the contract has been completed and the final cleaning up performed.

SAMPLES AND TESTS OF MATERIALS

Where, in the opinion of the Director of Public Works or as called for in the specifications, tests of materials are necessary, such tests will be made at the expense of the Contractor unless otherwise provided. The failure of the City to make any tests of materials shall in no way relieve the Contractor of his responsibility of furnishing materials conforming to the specifications.

Tests, unless otherwise specified, shall be made in accordance with latest methods of the American Society of Testing Materials. The Contractor shall provide such facilities as the Director of Public Works may require for collecting and forwarding samples and shall not use the materials represented by the samples until tests have been made. The Contractor shall furnish adequate sample containers without charge.

LAWS TO BE OBSERVED

The Contractor shall at all times observe and comply with all Federal and State Laws and City Ordinances and Regulations, which in any manner affect the conduct of the work, and shall observe and comply with all orders, laws, ordinances and regulations which exist or which may be enacted later by bodies having jurisdiction or authority for such enactment.

No plea of misunderstanding or ignorance thereof will be considered.

The Contractor and his sureties shall indemnify and save harmless the City and all its officers, agents, and employees against claims or liability arising from or based on the violation of any law, ordinance, regulation or order, whether by himself or employee.

PUBLIC CONVENIENCE AND SAFETY

Precautions shall be exercised at all times for the protection of persons (including employees) and property. The safety provisions of applicable laws, buildings and construction codes shall be observed. Machinery, equipment, and all hazards shall be guarded or eliminated in accordance with the safety provisions of the Manual of Accident Prevention and Construction published by the Associated General Contractors of America to the extent that such provisions are not in contravention of applicable law.

Materials stored about the work shall be so placed, and the work shall, at all times, be so conducted as to cause no greater obstruction to the public than is considered necessary by the Director of Public Works. The Contractor shall make provisions by bridges or otherwise at all cross streets, highways, sidewalks, and private driveways for the free passage of pedestrians and vehicles, provided that where bridges are impracticable or unnecessary, in the opinion of the Director of

Public Works, the Contractor may make arrangements satisfactory to the Director of Public Works for the diversion of traffic, and shall at his own expense, provide all material, and perform all work necessary for the construction and maintenance of roadways and bridges for the diversion of traffic. Sidewalks must not be obstructed except by special permission of the Director of Public Works. The materials excavated, and the construction materials or plant used in the construction of the work, shall be placed so as not to endanger the work or prevent free access to all fire hydrants, water valves, gas valves, manholes for telephone, telegraph, signal or electric conduits, sanitary or storm sewers, and fire alarm or police call boxes in the vicinity.

The City reserves the right to remedy any neglect on the part of the Contractor, as regards public convenience and safety, which may come to its attention after twenty-four hours notice in writing to the Contractor, save in cases of emergency when it shall have the right to remedy any neglect without notice; in either case, the cost of such work done by the City shall be deducted from monies due the Contractor. The Contractor shall notify the Fire Department headquarters when any street is closed or obstructed, and when directed by the Director of Public Works, shall keep any street or streets in condition for unobstructed use by fire apparatus. The Contractor will be required to give the Traffic Division of the police Department a twenty-four hour notice of intent to cut any street in the project. This notice may be given by telephone. A separate notice must be given whenever any additional street in the contract is to be cut. Where the Contractor is required to construct, his responsibility for accidents shall include the roadway approaches as well as the structures of such crossings.

PROTECTION AND RESTORATION OF PROPERTY

Where the work passes over or through private property, the City will provide the right-of-way shown on plans. The Contractor shall notify the proper representatives of any public utility, corporation, any company or any individual, not less than forty-eight hours in advance of any work which might damage or interfere with the operation of their, or his, property along or adjacent to the work. The Contractor shall be responsible for all damage or injury to property of any character (except such as may be due to the provisions of the contract documents), by reason of any negligent act or omission on the part of the Contractor or the Contractor's employees or agents, or at any time due to defective work or materials, or due to his failure to reasonably or properly prosecute the work, and said responsibility shall not be released until the work shall have been completed and accepted. When and where any such damage or injury is done to public or private property on the part of the Contractor he shall restore or have restored at his own cost and expense such property to a condition similar or equal to that existing before such damage was done, by repairing or otherwise restoring as may be directed, or he shall make good such damage from injury in a manner acceptable to the Director of Public Works. In addition to the above he shall:

- (1) Cause any fences upon the real estate that may be injured or destroyed to be removed and replaced.
- (2) Cause any bushes, flowers, or shrubbery upon the real estate to be removed and replaced when necessary to avoid destruction or injury, covenanting only to use reasonable care to preserve the life and condition of same.

- (3) Cause any excavation upon the real estate to be backfilled and graded to the original grade.
- (4) Remove, insofar as reasonably possible, all debris resulting from construction, including rock.
- (5) Cause the reseeded of any disturbed area.
- (6) Preserve, insofar as reasonably possible and where it will not unreasonably interfere in the progress or the completion of the work, the life and condition of any tree upon the real estate.
- (7) Provide at reasonable times during construction, reasonable access to the public street where any excavation upon the real estate might otherwise interfere therewith.
- (8) Replace any improved walkway, drive, or retaining wall damaged or destroyed by construction.
- (9) Cause all lot corner pins disturbed by his operation to be reset by a registered land surveyor and will file with the City a certificate from the surveyor that says pins have been reset, or agreement to reset such pins as may be later found to be disturbed.

In case of failure on the part of the Contractor to restore such property, or make good such damage or injury, the Director of Public Works may, upon forty-eight hours written notice under ordinary circumstances and without notice when a nuisance or hazardous condition results, proceed to repair, rebuild, or otherwise restore such property as may be determined necessary, and the cost thereof will be deducted from any monies due, or to become due, the Contractor under his contract.

It is the intention of the above paragraph that clean up shall follow immediately after and at the same rate as construction.

SHEETING, TIMBERING, OR BRACING

The Contractor shall place sheeting, timbering, or bracing, wherever necessary for the proper preserving of any excavation, embankment, or structure. Where the material is of such a character, or other conditions are such as to render it necessary, the sheeting shall be closely driven and to such depth below the lowest point of the final excavation as may be directed.

The Contractor shall be held responsible for the sufficiency of all sheeting, and proper quality, strength, placing, maintaining, or removing the same. No extra compensation will be made for sheeting and bracing whether left in place or not.

The Contractor shall, at his own expense, shore up, protect, and insure from injury, all buildings, retaining walls, viaduct piers and footings, storm sewers, sanitary sewers, gas lines, water lines,

fences, curbs, trees, or other property liable to be injured during the progress of the work, and he will be held responsible for all damage which may occur by reason or prosecution of the work.

REMOVAL OF WATER

The Contractor shall furnish and operate sufficient pumps and appliances, and shall provide all materials, labor, etc., required to prevent interference with any work by water, ice or snow. Damage of any kind resulting from insufficient pumping facilities or similar lack of proper conduct of the work shall be made good by the Contractor at his own expense. No structure or pipes shall be laid in water and no water shall be allowed to run into or over any concrete work or pipe, or into or through any pipe, unless by special permission in writing by the Director of Public Works.

LEAKS OR SPRINGS

When leaks or springs are found which, in the opinion of the Director of Public Works, affecting the safety or usefulness or satisfactory operation of any of the permanent work, he may direct special provisions to be taken. Such work shall be performed without extra compensation.

BACKFILLING

Material used for backfilling at structures shall be free from perishable matter and from other material liable to become unstable when saturated with water after having been compacted. No frozen material shall be used in the backfill. Care shall be taken to avoid injury to the structures or producing unequal pressure thereon. Special precautions shall be taken in backfilling over pipes. No backfill shall be placed over any portion of pipes not inspected by the Director of Public Works and the joints have been hard set. The trenches must be filled to the height which previously existed, unless the Director of Public Works shall otherwise direct.

Whenever, in the opinion of the Director of Public Works, the material excavated from the trenches is not suitable for filling around the sewer pipe, or there is a deficiency of material, the Contractor shall, at his own expense, provide suitable material.

CONTRACTORS LIABILITY

- (a) Sufficient amber lights shall be maintained on the work from sunset to sunrise to make all excavations and dangerous places safe to vehicular traffic and pedestrians. Barriers shall be kept at all times to prevent accidents. Proper provisions shall be made for taking care of traffic during construction at all street intersections. Failure of Contractor to comply with this paragraph may result in the issuance of summons and fine in Municipal Court.
- (b) The Contractor shall be held responsible for any damage to person or property through any negligence of himself or his employees.
- (c) The Contractor assumes full responsibility and the City in no event is to be held liable for the use of any patented materials, equipment, or method of construction.

- (d) The Contractor assumes all risks as to the legality and illegality, validity and invalidity of this contract and the proceedings of the City Council in regard to this project.
- (e) All sidewalks and driveways, private or public property, disturbed or damaged, shall be restored to their former condition or to the satisfaction of their owner. All drains, culverts bridges, etc., shall be protected from damage, or rebuilt if damaged. All gutters, ditches, etc., shall be cleaned out and no waterway shall be left in an obstructed condition. All fences shall be promptly repaired.
- (f) The Contractor shall be responsible for the entire work included in this contract until the same is completed, tested and accepted by the Director of Public Works, and final payment and formal release made by the City.
- (g) It shall be the duty of the Contractor to notify the City Utilities, all Public Service Corporations, and individuals, to remove within ten days after notification, all poles, pipes, conduits of any kind, that may be in the way of any structure or in the line of pipe, provided the Director of Public Works deems it necessary to be so removed. The Contractor shall use proper care in fulfilling this contract to protect all pipes, poles and conduits to the best of his ability.
- (h) If the Contractor shall negligently fail to place sufficient amber lights or barricades to provide proper protection to vehicles or pedestrians and the City finds it necessary to place additional barricades, the Contractor shall reimburse the City for same at the rate of \$15.00 per barricade for each such occasion, or the total amount withheld from monies due the Contractor.

SANITATION

The Contractor shall provide necessary sanitary conveniences for the use of all laborers on the work, properly secluded from the public observation, built and maintained in a manner and at such points as approved by the Director of Public Works. Their use shall be strictly enforced and no nuisance shall be created on either public or private property in the vicinity of any work.

ADJUSTMENT TO SANITARY SEWERS

Any and all adjustments to sanitary sewer facilities existing at the time of construction shall be made by the City. This shall include all trunk sewer lines, district sewer lines, house laterals and all appurtenances such as manholes, lamp holes, cleanouts, wyes, tees, risers, and bends. Any adjustments, or removal and replacement, which may be required in order to carry out the normal prosecution of the work shall be performed by the City in such a manner that the sanitary sewer facility will be left in as good or better condition than existing at the initiation of this project.

Any adjustment, or removal and replacement, called for under this provision will not be recognized as a basis of claim by the Contractor for additional compensation. All such costs of adjustment, or removal and replacement, shall be a part of the construction of the items of work called for in

the bid proposal and will be considered paid for when the Contractor is paid for these items of work.

REMOVAL OF DRAINAGE PIPE AND CULVERTS

The drainage structures at all driveways and private entrance, which must be removed during the normal prosecution of the work called for under this project, shall be deemed the property of the City of Bolivar. The Contractor shall use reasonable care in the removal of all drainage structures and stack them for salvage by the owner. Should the private property owner not wish to claim said drainage structures, the City of Bolivar shall have prior rights over the Contractor to claim said drainage structures for salvage. In the event that the private property owner and the City of Bolivar both relinquish their claims to said structures, the Contractor shall have the right to salvage such structures. It will be the Contractor's responsibility to notify the owner, in writing, that said structures are available for salvage, and upon expiration of three (3) working days of such written notice the owner has not removed said drainage structures from the site of the work under this contract by the Contractor, it shall be deemed that the owner has relinquished all claim to said drainage structures, and said drainage structures may be disposed of by the Contractor.

OPENING OF TRAFFIC

The pavement shall not be opened to traffic or to construction equipment of the Contractor, until so ordered by the Director of Public Works.

CLEANING OF RIGHT-OF-WAY

Upon completion of any portion of the work, all the land and right-of-way shall be cleaned of all surplus material, earth, rubbish, etc., and left in good condition.

TIME OF COMPLETION

Unless otherwise specified in the "Special Provision", work on this contract shall be started within 30 days after the contract has been properly executed and the work shall be completed in the time set forth in the contract.

MAINTENANCE

The Contractor shall maintain all trenches for a period of one year after the completion and acceptance by the City. Said maintenance shall include backfill of settlement in trenches and all costs of labor and materials pertaining thereto.
